

# VBA MsgBox Notes

## Option Explicit

## Common Button & Icon Constants

### Buttons:

- `vbOKOnly` - OK button only
- `vbYesNo` - Yes & No buttons
- `vbYesNoCancel` - Yes, No, Cancel buttons
- `vbAbortRetryIgnore` - Abort, Retry, Ignore buttons

### Icons:

- `vbInformation` - Info icon
- `vbExclamation` - Warning icon
- `vbCritical` - Red error icon
- `vbQuestion` - Question mark icon

## In Summary:

- `MsgBox` is useful for showing messages and getting user input.
- Always store result in a variable (`response = MsgBox( . . . )`) when using multiple buttons.
- Combine button + icon for better user interaction.
