

Dashboard Creation Guide

Step-by-Step Instructions for All 5 Dashboard Pages

Project	InsureVision Analytics — SafeGuard Insurance Pvt. Ltd.
Domain	Insurance (Health Life Motor Home Travel)
Total Pages	5 Dashboard Pages with 25+ Visuals
KPIs Used	40 DAX Measures across all pages
Visual Types	Card, Bar, Line, Donut, Matrix, Scatter, Map, Treemap, Funnel, Table
Slicers	Year, PolicyType, State, Gender, Segment, Channel, Status
Features	Drill-through, Sync Slicers, Conditional Formatting, Dynamic Titles

This guide provides exact step-by-step instructions for building every visual on every page of the Power BI dashboard — including which fields go in which wells (Axis, Values, Legend, Filters), which DAX measures to use, and how to format each visual professionally.

Before You Start — Canvas & Theme Setup

Complete these steps once before building any page:

► **Set Canvas Size**

- Go to View tab → Page View → Actual Size
- File → Options → Report Settings → Canvas background → White (#FFFFFF)
- Recommended canvas: 1280 × 720 px (16:9 widescreen)

► **Apply Theme**

- View tab → Themes → Browse for themes → Or use built-in 'Executive' theme
- Primary brand color: #1F4E79 (Dark Blue) — set as first theme color
- Accent colors: #2E75B6 (Mid Blue), #375623 (Green), #C00000 (Red), #F4B942 (Amber)

► **Add Page Background**

- Click on blank canvas → Visualizations pane → Format → Page background
- Color: #F2F7FF (very light blue) OR import a background image (.png)
- Transparency: 0% so color shows fully

► **Create Page Header Banner**

- Insert → Shapes → Rectangle → Stretch across top (full width, ~60px height)
- Format Shape → Fill color: #1F4E79 | Border: None
- Insert → Text Box on top of rectangle → Type page title in white bold text
- Font: Segoe UI, Size: 18, Color: White, Bold
- Group the rectangle + text box: Select both → Ctrl+G → Rename group 'Header'

► **Add Company Logo Area**

- Insert → Shapes → Rectangle (small, top-left) → Fill: White, Border: None
- Insert → Text Box → Type 'SafeGuard Insurance' in #1F4E79 bold font
- OR Insert → Image → browse for a logo file

► **Add Navigation Buttons (all 5 pages)**

- Insert → Buttons → Blank button → Format → Shape fill: #2E75B6
- Button Text: 'Overview', 'Claims', 'Policy', 'Agent', 'Customer'
- Action → Type: Page Navigation → Destination: select target page
- Copy-paste these 5 buttons to ALL pages and sync them

TIP: Build the header, navigation buttons, and company logo on Page 1 first. Then right-click each page tab → Duplicate Page to copy the layout to all 5 pages, then just replace the visuals on each page.

Page 1: Executive Overview

This is the LANDING PAGE of the dashboard. It gives the CEO and senior management a bird's-eye view of the entire insurance portfolio. It contains 5 KPI cards at the top, followed by 4 main visuals, and 2 slicers on the right side.

Page 1 — Layout Blueprint

Zone	Visual Type	Position	Size
Top Row	5 × KPI Cards	Top, full width	Small cards, equal width
Left Center	Line Chart — Monthly Claims Trend	Center-left	Large (50% width)
Right Center	Donut Chart — Policy Type Split	Center-right	Medium (25% width)
Bottom Left	Bar Chart — Top 10 States by Claims	Bottom-left	Medium-large
Bottom Right	Card — YTD vs PYTD Comparison	Bottom-right	Medium
Far Right	2 Slicers (Year + PolicyType)	Right sidebar	Narrow column

Visual 1: KPI Cards (5 Cards — Top Row)

Use the **Card** visual from the Visualizations pane. Create 5 separate Card visuals and place them in a row across the top of the canvas.

Card #	Card Title	DAX Measure to Drag	Format	Card Color
Card 1	Total Policies	Total_Active_Policies	Whole Number, no decimals	#1F4E79
Card 2	Total Premium (■)	Total_Annual_Premium	■ format, 0 decimals, show in Lakhs	#2E75B6
Card 3	Total Claims Filed	Total_Claims_Filed	Whole Number	#375623
Card 4	Settlement Ratio (%)	Claim_Settlement_Ratio	Decimal, 1 place, add % symbol	#C00000
Card 5	Loss Ratio (%)	Loss_Ratio	Decimal, 1 place, add % symbol	#7B3F00

How to create each Card visual:

- Click blank area on canvas → Visualizations pane → click Card icon (looks like a square with a number)
- From Fields pane: Drag FACT_Claims table → find your measure (e.g. Total_Active_Policies) → drag into 'Fields' well
- Format pane (paint roller icon) → Callout value → Font size: 28, Bold, Color: #1F4E79
- Format → Category label → Text: type your card title (e.g. 'Total Policies'), Font: 11, Color: #555555
- Format → Background → ON → Color: White (#FFFFFF) | Border → ON → Color: #2E75B6, Rounded corners: 5px
- Format → General → Shadow → ON (gives depth effect)
- Resize card to equal width. Copy-paste 4 more times, then change the measure in each.

TIP: To add a small colored icon/indicator above each card, use Insert → Icons (Power BI built-in icons) or insert shapes. Use green upward triangle for positive KPIs, red downward for risk KPIs.

Visual 2: Line Chart — Monthly Claims Trend (2019–2024)

Field Well	What to Drag Here	From Which Table
X-Axis	YearMonth (or MonthName + Year hierarchy)	DIM_Date
Y-Axis (Values)	Total_Claim_Amount (measure)	Measures Table / FACT_Claims
Secondary Y-Axis	Total_Claims_Filed (measure)	Measures Table
Legend	(Leave empty — single line)	—
Tooltips	Claim_Settlement_Ratio, Avg_Processing_Days	Measures Table

Step-by-step:

- Click blank canvas → Visualizations → Line Chart icon (zigzag line)
- X-Axis well: Drag DIM_Date[YearMonth] column — this gives monthly granularity
- Y-Axis well: Drag Total_Claim_Amount measure
- Secondary Y-Axis: Drag Total_Claims_Filed measure (this creates dual-axis line)
- Format → Lines → Line 1 (Claim Amount): Color #1F4E79, Width: 2.5px, Stroke: Solid
- Format → Lines → Line 2 (Count): Color #C00000, Width: 2px, Stroke: Dashed
- Format → Data labels → ON → Font size: 9
- Format → X-axis → Title: 'Month-Year', Font: 10, Color: #333333
- Format → Y-axis → Title: 'Claim Amount (■)', Display units: Lakhs
- Format → Title → Text: 'Monthly Claims Trend | 2019–2024', Bold, Size: 13, Color: #1F4E79
- Format → Background → White | Border → ON → Light blue #C5D8F0
- Add trend line: Analytics pane (magnifying glass icon) → Trend Line → ON → Color: #F4B942, dashed

Visual 3: Donut Chart — Policy Type Distribution

Field Well	What to Drag Here	From Which Table
Legend	PolicyType	DIM_Policy
Values	Total_Active_Policies (measure)	Measures
Tooltips	Total_Annual_Premium, Loss_Ratio	Measures

Step-by-step:

- Visualizations → Donut Chart icon (circle with hole)
- Legend: DIM_Policy[PolicyType] | Values: Total_Active_Policies measure
- Format → Slices → assign distinct colors per policy type (Health=#1F4E79, Life=#2E75B6, Motor=#375623, Home=#C00000, etc.)
- Format → Detail labels → ON → Label contents: 'Category, Percent of total'
- Format → Legend → Position: Right, Font: 9
- Format → Inner radius: 50% (creates donut hole)
- Format → Title: 'Policy Type Distribution'
- In center of donut: Insert → Text Box → type 'Policies' → position over the donut hole

Visual 4: Clustered Bar Chart — Top 10 States by Claim Amount

Field Well	What to Drag Here	From Which Table
Y-Axis	State	DIM_Customer
X-Axis (Values)	Total_Claim_Amount (measure)	Measures
Legend	(empty — single color)	—
Tooltips	Total_Claims_Filed, Claim_Rejection_Rate	Measures
Filters on this visual	Top N filter: Top 10 by Total_Claim_Amount	Visual-level filter

Step-by-step:

- Visualizations → Clustered Bar Chart (horizontal bars)
- Y-Axis: DIM_Customer[State] | X-Axis: Total_Claim_Amount measure
- Filters pane (funnel icon) → 'Filters on this visual' → drag State field
- Filter type: Top N → Top 10 → By value: Total_Claim_Amount → Apply filter
- Format → Bars → Color: #2E75B6 | Data labels: ON
- Format → Sort → Sort by: Total_Claim_Amount, Descending
- Format → X-axis → Display units: Lakhs | Title: 'Claim Amount (■ Lakhs)'
- Format → Y-axis → Title: 'State' | Font size: 10
- Format → Title: 'Top 10 States by Claim Amount'

Visual 5: Multi-Row Card — YTD vs PYTD Comparison

Step-by-step:

- Visualizations → Multi-Row Card (stacked cards visual)

- Fields well: drag YTD_Claims_Amount, Prev_Year_Claims, YoY_Growth_Pct measures
- Format → Card title → ON → 'Year-on-Year Claims Comparison'
- Format → Data labels → Font: Bold, Size: 18 for values
- Format → Category labels → Font: 10, Color: #555555
- Add conditional formatting: Select YoY_Growth_Pct field → Format → Conditional formatting
- Rules: If value > 0 → Green (#27AE60) | If value < 0 → Red (#C0392B)

Slicers — Right Sidebar

Slicer #	Field to Use	Slicer Style	Sync to Pages
Slicer 1	DIM_Date[Year]	Dropdown or Tile style	All 5 pages
Slicer 2	DIM_Policy[PolicyType]	Vertical List with checkboxes	Pages 1, 2, 3

Slicer setup steps:

- Visualizations → Slicer icon (funnel)
- Drag DIM_Date[Year] into Field well
- Format → Slicer header → Title: 'Select Year' | Font: Bold, 10, Color: #1F4E79
- Format → Items → Font: 10 | Selection color: #2E75B6
- Format → Background → White | Border → ON → #C5D8F0
- To sync: View → Sync Slicers panel → check all pages you want this slicer active on
- Repeat for PolicyType slicer

Page 2: Claims Analysis

This page is for the **Claims Head and Risk Team**. It dives deep into claim patterns, rejection reasons, fraud, and processing efficiency. This is the most data-rich page.

Zone	Visual Type	Key Measure Used
Top Row	5 × KPI Cards	Total_Claim_Amount, Total_Approved_Amount, Claim_Rejection_Rate, Avg_Processing_Days, Fraud_Claims_Amount
Center Left	Clustered Bar — Claim Status by Policy Type	Approved/Rejected/Pending counts
Center Right	Matrix — Rejection Reason vs Policy Type	Claim_Rejection_Rate %
Bottom Left	Scatter Plot — Claim Amount vs Processing Days	Claim_Amount, ProcessingDays
Bottom Right	Line Chart — Monthly Trend with Rolling 3M	Total_Claim_Amount, Rolling_3M_Claims
Right sidebar	Slicers: Year, ClaimStatus, ClaimCategory	—

Visual 1: KPI Cards (5 Cards — Top Row)

Card #	Title	DAX Measure	Format Notes
Card 1	Total Claim Amount	Total_Claim_Amount	■ in Lakhs, 2 decimal
Card 2	Total Approved (■)	Total_Approved_Amount	■ in Lakhs, 2 decimal, Green color
Card 3	Rejection Rate (%)	Claim_Rejection_Rate	%, 1 decimal — Red color if > 15%
Card 4	Avg Processing Days	Avg_Processing_Days	1 decimal, add 'days' suffix label
Card 5	Fraud Claims (■)	Fraud_Claims_Amount	■ in Lakhs, Orange warning color

IMPORTANT for Rejection Rate Card: Add conditional formatting — if Claim_Rejection_Rate > 15 → card background turns light red, font turns dark red. This alerts management to high rejection periods.

Visual 2: Clustered Bar — Claim Status by Policy Type

Field Well	What to Drag	Table
Y-Axis	PolicyType	DIM_Policy
X-Axis (Values)	Total_Claims_Filed measure	Measures
Legend	ClaimStatus	FACT_Claims
Tooltips	Claim_Settlement_Ratio, Claim_Rejection_Rate	Measures

Step-by-step:

- Visualizations → Clustered Bar Chart
- Y-Axis: DIM_Policy[PolicyType] | X-Axis: Total_Claims_Filed measure
- Legend: FACT_Claims[ClaimStatus] — this stacks bars by claim status per policy type
- Format → Colors: Approved = #27AE60 (Green), Rejected = #C0392B (Red), Pending = #F39C12 (Amber), Under Review = #2980B9, Partially Approved = #8E44AD
- Format → Data labels: ON | Font size: 9
- Format → Legend: Position: Top, Font: 9
- Format → Title: 'Claims by Status and Policy Type'
- Enable drill-through: Right-click chart → Add drill-through → select Claim Detail page

Visual 3: Matrix — Rejection Reason vs Policy Type

Field Well	What to Drag	Table
Rows	RejectionReason	FACT_Claims
Columns	PolicyType	DIM_Policy
Values	Claim_Rejection_Rate measure	Measures

Step-by-step:

- Visualizations → Matrix icon (grid-like table)
- Rows: FACT_Claims[RejectionReason] | Columns: DIM_Policy[PolicyType]
- Values: Drag Claim_Rejection_Rate measure into Values well
- Format → Cell elements → Background color → ON → Conditional formatting
- Set color scale: Min (White) → Max (#C0392B Red) — darker red = higher rejection rate
- Format → Column headers → Bold, #1F4E79 background, White text
- Format → Row headers → Bold, Font size: 10
- Format → Values → Show as: Percentage | Decimal places: 1
- Format → Grid → Row padding: 6 | Column dividers: ON
- Format → Title: 'Rejection Reason Heatmap by Policy Type'

Visual 4: Scatter Plot — Claim Amount vs Processing Days

Field Well	What to Drag	Table
X-Axis	Avg_Processing_Days measure	Measures

Field Well	What to Drag	Table
Y-Axis	Total_Claim_Amount measure	Measures
Details	ClaimID (to plot individual claims)	FACT_Claims
Legend	ClaimCategory	FACT_Claims
Size	Total_Approved_Amount measure	Measures
Tooltips	ClaimType, ClaimStatus, HospitalName	FACT_Claims

Step-by-step:

- Visualizations → Scatter Chart icon (dots on grid)
- X-Axis: Avg_Processing_Days | Y-Axis: Total_Claim_Amount
- Details: FACT_Claims[ClaimID] — this plots each claim as individual dot
- Legend: FACT_Claims[ClaimCategory] — colors dots by High/Medium/Low
- Size: Total_Approved_Amount — bigger bubble = higher approved amount
- Format → Data colors: High = #C0392B, Medium = #F39C12, Low = #27AE60
- Format → X-axis → Title: 'Processing Days' | Y-axis → Title: 'Claim Amount (■)'
- Analytics pane → Trend line: ON → separate trend per category
- Format → Title: 'Claim Amount vs Processing Time (by Category)'
- Add reference line: Analytics → X-axis constant line → Value: 30 (30-day SLA) → Label: 'SLA Breach Threshold'

Visual 5: Line Chart — Monthly Claims with Rolling 3M Average

Field Well	What to Drag	Table
X-Axis	YearMonth	DIM_Date
Y-Axis (Line 1)	Total_Claim_Amount measure	Measures
Y-Axis (Line 2)	Rolling_3M_Claims measure	Measures
Tooltips	MTD_Claims_Amount, Prev_Month_Claims	Measures

Step-by-step:

- Visualizations → Line Chart
- X-Axis: DIM_Date[YearMonth] | Y-Axis: Total_Claim_Amount and Rolling_3M_Claims
- Format → Lines → Line 1 (Total Claims): Solid, #1F4E79, Width: 2.5
- Format → Lines → Line 2 (Rolling 3M): Dashed, #F39C12, Width: 2
- Format → Markers: ON for Rolling 3M line → circle markers
- Format → Title: 'Monthly Claims vs 3-Month Rolling Average'
- Format → Legend: Top → Shows which line is which

Drill-Through Page Setup (Claim Detail)

Create a 6th hidden page called 'Claim Detail' for drill-through:

- Right-click Page tab → Add Page → Name it 'Claim Detail'

- Visualizations → Filters pane → Drill-through section → drag ClaimID into it
- Add a Table visual with: ClaimID, PolicyID, CustomerID, ClaimDate, ClaimType, ClaimAmount, ApprovedAmount, ClaimStatus, RejectionReason, ProcessingDays
- Add 3 KPI cards: Claim Amount, Approved Amount, Processing Days
- Insert → Button → Back (to return to Claims Analysis page)
- Right-click page tab → Hide Page (it only opens via drill-through)

Page 3: Policy Performance

This page is for the **Sales Head and Finance team**. It shows how policies are performing in terms of premium collection, policy status, channel performance, and product mix.

Zone	Visual Type	Key Measure
Top Row	4 × KPI Cards	Total_Active_Policies, Active_Policy_Premium, Lapsed Policy Count, Weighted_Avg_Premium
Center Left	Stacked Bar — Premium by Type & Payment Freq	Total_Annual_Premium
Center Right	Area Chart — Policies Sold Over Time	COUNT of PolicyID by year
Bottom Left	Treemap — Policy by Channel	Total_Annual_Premium by Channel
Bottom Right	Table — Top 10 Policies	PolicyID, Type, Premium, Status, Agent
Right	Slicers: PolicyStatus, Channel, PolicyType	—

Visual 1: KPI Cards (4 Cards)

Card #	Title	DAX Measure / Field	Notes
Card 1	Active Policies	Total_Active_Policies	Whole number, Blue
Card 2	Active Premium (■)	Active_Policy_Premium	■ Lakhs, Green
Card 3	Lapsed Policies	CALCULATE(COUNTROWS(DIM_Policy), PolicyStatus='Lapsed')	Red color — risk indicator
Card 4	Avg Annual Premium	Weighted_Avg_Premium	■ format, 0 decimal

Visual 2: Stacked Bar — Premium by Policy Type & Payment Frequency

Field Well	What to Drag	Table
Y-Axis	PolicyType	DIM_Policy
X-Axis (Values)	Total_Annual_Premium measure	Measures
Legend	PaymentFrequency	DIM_Policy
Tooltips	Health_Policy_Count, Distinct_Policy_Types	Measures

Step-by-step:

- Visualizations → Stacked Bar Chart
- Y-Axis: DIM_Policy[PolicyType] | X-Axis: Total_Annual_Premium
- Legend: DIM_Policy[PaymentFrequency] — stacks show premium split by payment mode per product
- Format → Colors by PaymentFrequency: Monthly=#1F4E79, Quarterly=#2E75B6, Half-Yearly=#375623, Annually=#C00000
- Format → Data labels: ON | X-axis: Display units: Lakhs
- Format → Title: 'Annual Premium by Policy Type & Payment Frequency'
- Format → Sort: Sort by Total_Annual_Premium Descending

Visual 3: Area Chart — Policies Sold Over Time

Field Well	What to Drag	Table
X-Axis	PolicyStartDate (Year level)	DIM_Policy
Y-Axis	COUNT of PolicyID (use COUNTROWS)	DIM_Policy or Measures
Legend	PolicyType	DIM_Policy
Tooltips	Total_Annual_Premium, Active_Policy_Premium	Measures

Step-by-step:

- Visualizations → Area Chart
- X-Axis: DIM_Policy[PolicyStartDate] — click the date hierarchy → select 'Year'
- Y-Axis: Drag DIM_Policy[PolicyID] → it auto-counts. OR create measure: Policies_Sold = COUNTROWS(DIM_Policy)
- Legend: DIM_Policy[PolicyType] — different colored areas per product
- Format → Lines → Transparency: 60% so areas stack visually
- Format → Title: 'Policies Sold by Year and Product Type'
- Format → Zoom slider: ON (View → Zoom slider) — lets user zoom into specific years

Visual 4: Treemap — Policy Distribution by Channel

Field Well	What to Drag	Table
Category	Channel	DIM_Policy
Values	Total_Annual_Premium measure	Measures
Details	PolicyType	DIM_Policy
Tooltips	Health_Policy_Count, Distinct_Claimants	Measures

Step-by-step:

- Visualizations → Treemap icon (nested rectangles)
- Category: DIM_Policy[Channel] | Values: Total_Annual_Premium
- Details: DIM_Policy[PolicyType] — creates sub-rectangles within each channel

- Format → Data labels: ON → show Category and % of total
- Format → Colors: each channel gets distinct color from theme palette
- Format → Title: 'Premium Distribution by Sales Channel'

Visual 5: Table — Top 10 Policies by Premium

Column	Source	Format
PolicyID	DIM_Policy[PolicyID]	Text
PolicyType	DIM_Policy[PolicyType]	Text
AnnualPremium	DIM_Policy[AnnualPremium]	■ format, no decimals
CoverageAmount	DIM_Policy[CoverageAmount]	■ in Lakhs
PolicyStatus	DIM_Policy[PolicyStatus]	Text with conditional color
AgentName	DIM_Agent[AgentName]	Text (via relationship)
Policy_Type_Rank	Policy_Type_Rank measure	Number — rank column

Step-by-step:

- Visualizations → Table icon (grid)
- Drag each column listed above into the Values well
- For PolicyStatus: Format → Cell elements → Background color → ON
- Conditional formatting rules: Active = Green (#D5F5E3), Lapsed = Red (#FADBD8), Expired = Gray (#F2F3F4)
- Format → Column headers → Bold, Background: #1F4E79, Text: White
- Add Top N filter: Filters pane → drag AnnualPremium → Top N → Top 10
- Sort table by AnnualPremium Descending by default
- Format → Row height: 30 | Alternating row color: #EBF3FB

Page 4: Agent Performance

This page is for **Regional Managers and HR**. It benchmarks each agent's performance against their target, shows regional productivity, and highlights top performers.

Zone	Visual Type	Key Measure
Top Row	4 × KPI Cards	Total Agents, Active Agents, Total Premium via Agents, Avg Target Achievement %
Center Left	Table — Agent Leaderboard	Agent Name, Policies, Premium, Rank, Target Status
Center Right	Bar Chart — Premium by Region	Total_Annual_Premium by Region
Bottom Left	Scatter — Experience vs Premium	ExperienceYears vs Total_Annual_Premium
Bottom Right	Map Visual — Agents by State	Agent count / Premium by State
Right	Slicers: Region, AgentType, AgentStatus	—

Visual 1: KPI Cards (4 Cards)

Card #	Title	DAX / Field	Notes
Card 1	Total Agents	COUNTROWS(DIM_Agent)	Whole number
Card 2	Active Agents	CALCULATE(COUNTROWS(DIM_Agent), AgentStatus='Active')	Green color
Card 3	Total Agent Premium	Total_Annual_Premium (filtered by agents)	■ Lakhs
Card 4	Agents Hit Target	CALCULATE(COUNTROWS(DIM_Agent), [Agent_Target_Status]='Target Achieved ✓')	Green, shows X/15

Visual 2: Agent Leaderboard Table

Column	Source / Measure	Format
Rank	Top_Agent_Premium_Rank measure	Number 1,2,3... — add medal emoji for top 3
AgentName	DIM_Agent[AgentName]	Bold text
Region	DIM_Agent[Region]	Text

Column	Source / Measure	Format
Policies Sold	COUNTROWS(DIM_Policy) in agent context	Whole number
Total Premium (■)	Total_Annual_Premium	■ Lakhs
Target (■)	DIM_Agent[Target_Annual]	■ Lakhs
Achievement %	DIVIDE(Total_Annual_Premium, MAX(Target_Annual))*100	%, 1 decimal
Target Status	Agent_Target_Status measure	Conditional colored text

Step-by-step:

- Visualizations → Table
- Add all columns from the table above into Values well
- For Target Status column: Format → Cell elements → Font color → Conditional formatting
- Rules: 'Target Achieved ✓' → Font Green | 'Target Pending ✗' → Font Red
- For Achievement %: Format → Cell elements → Background → Data bars
- Data bar colors: Positive = #27AE60, Negative = #C0392B
- Sort by Total Premium Descending by default
- Format → Column widths: auto-fit | Row striping: alternating #EBF3FB / White
- Format → Title: 'Agent Performance Leaderboard'
- Add a text box: 'Top 3 agents contribute X% of total premium' — use a dynamic measure for this

Visual 3: Bar Chart — Premium by Agent Region

Field Well	What to Drag	Table
X-Axis	Region	DIM_Agent
Y-Axis (Values)	Total_Annual_Premium measure	Measures
Legend	AgentType	DIM_Agent
Tooltips	Distinct_Policy_Types, Total_Active_Policies	Measures

Step-by-step:

- Visualizations → Clustered Column Chart (vertical bars)
- X-Axis: DIM_Agent[Region] | Y-Axis: Total_Annual_Premium
- Legend: DIM_Agent[AgentType] — shows how each agent type contributes to region premium
- Format → Colors by AgentType: Field Agent=#1F4E79, Tele Agent=#2E75B6, Broker=#375623, Online=#F39C12
- Format → Data labels: ON | Y-axis: Display units: Lakhs
- Format → Title: 'Premium Collection by Region & Agent Type'
- Sort bars by Region total Descending

Visual 4: Scatter — Experience Years vs Premium Collected

Field Well	What to Drag	Table
X-Axis	ExperienceYears	DIM_Agent
Y-Axis	Total_Annual_Premium measure	Measures
Details	AgentName	DIM_Agent
Legend	Region	DIM_Agent
Tooltips	Target_Annual, Agent_Target_Status	DIM_Agent / Measures

Step-by-step:

- Visualizations → Scatter Chart
- X-Axis: DIM_Agent[ExperienceYears] | Y-Axis: Total_Annual_Premium
- Details: DIM_Agent[AgentName] — one dot per agent
- Legend: DIM_Agent[Region] — dots colored by region
- Format → Data labels: ON → show AgentName on each dot
- Analytics pane → Trend line: ON → shows if experience correlates with premium
- Format → Title: 'Agent Experience vs Premium Performance'

Visual 5: Map — Agent Locations by State

- Visualizations → Map icon (globe/pin icon) — OR use Filled Map for state shading
- Location: DIM_Agent[State] — Power BI auto-geocodes Indian state names
- Size (bubble): Total_Annual_Premium measure — bigger bubble = more premium
- Color: DIM_Agent[Region] — different colors per sales region
- Tooltips: AgentName, Total_Annual_Premium, Target_Annual, Agent_Target_Status
- Format → Bubbles → Min size: 8px, Max size: 40px
- Format → Map controls → ON — lets users zoom/pan
- Format → Title: 'Agent Premium Distribution by State'
- NOTE: If Map visual is disabled in your tenant, use Filled Map → Location: State → Color saturation: Total_Annual_Premium

Page 5: Customer Insights

This page is for **Marketing, CRM, and Retention teams**. It analyzes customer demographics, segment behavior, and the full customer journey from membership to claim resolution.

Zone	Visual Type	Key Measure
Top Row	5 × KPI Cards	Total Customers, Premium Segment %, Avg Age, Avg Income, Distinct Claimants
Center Left	Bar Chart — Customers by Segment	Customer count per Segment
Center Right	Stacked Bar — Claims by Gender & PolicyType	Total_Claims_Filed
Bottom Left	Funnel — Customer Journey	Member → Policy → Claim → Approval
Bottom Right	Table — Customer 360 View	Customer detail with all KPIs
Right	Slicers: State, Segment, Gender, MaritalStatus	—

Visual 1: KPI Cards (5 Cards)

Card #	Title	DAX / Measure	Notes
Card 1	Total Customers	COUNTROWS(DIM_Customer)	Whole number
Card 2	Premium Segment %	DIVIDE(CALCULATE(COUNTROWS(DIM_Customer),CustomerSegment='Premium'), COUNTROWS(DIM_Customer))*100	%, 1 decimal
Card 3	Average Age	AVERAGE(DIM_Customer[Age])	Whole number, add 'years' label
Card 4	Avg Annual Income	AVERAGE(DIM_Customer[AnnualIncome])	■ Lakhs format
Card 5	Distinct Claimants	Distinct_Claimants measure	Whole number

Visual 2: Bar Chart — Customers by Segment

Field Well	What to Drag	Table
X-Axis	CustomerSegment	DIM_Customer
Y-Axis (Values)	COUNTROWS(DIM_Customer) or Customer Count measure	DIM_Customer
Legend	(empty — single color per bar)	—

Field Well	What to Drag	Table
Tooltips	Avg_Claim_Amount, Distinct_Claimants	Measures

Step-by-step:

- Visualizations → Clustered Column Chart
- X-Axis: DIM_Customer[CustomerSegment] | Y-Axis: COUNTROWS(DIM_Customer)
- Format → Colors: Premium = #F39C12 (Gold), Standard = #2E75B6 (Blue), Basic = #95A5A6 (Gray)
- Format → Data labels: ON with percentage label
- Add conditional coloring: Format → Data colors → FX (conditional) → by CustomerSegment value
- Format → Title: 'Customer Distribution by Segment'
- Add a Pie Chart next to it showing same data — double representation for reports

Visual 3: Stacked Bar — Claims by Gender and Policy Type

Field Well	What to Drag	Table
Y-Axis	Gender	DIM_Customer
X-Axis (Values)	Total_Claims_Filed measure	Measures
Legend	PolicyType	DIM_Policy
Tooltips	Total_Claim_Amount, Claim_Settlement_Ratio	Measures

Step-by-step:

- Visualizations → Stacked Bar Chart
- Y-Axis: DIM_Customer[Gender] | X-Axis: Total_Claims_Filed
- Legend: DIM_Policy[PolicyType] — see which products are claimed more by each gender
- Format → Colors: use same color scheme as Page 3 for PolicyType consistency
- Format → Title: 'Claims Filed by Gender and Policy Type'
- Note: Relationship path: FACT_Claims → DIM_Policy (PolicyID) and FACT_Claims → DIM_Customer (CustomerID)

Visual 4: Funnel Chart — Customer Journey

The Funnel shows the customer drop-off at each stage — from all members, to those with policies, to those who filed claims, to those whose claims were approved.

Step-by-step:

- Create 4 measures for each funnel stage:
- Stage1_Members = COUNTROWS(DIM_Customer) → e.g. 500
- Stage2_PolicyHolders = COUNTROWS(DIM_Policy) → e.g. 800 (includes multi-policy customers)
- Stage3_Claimants = Distinct_Claimants measure → unique customers with claims
- Stage4_ApprovedClaimants = CALCULATE(DISTINCTCOUNT(FACT_Claims[CustomerID]), FACT_Claims[ClaimStatus]='Approved')

- Visualizations → Funnel Chart icon
- Values well: drag all 4 stage measures one by one
- Format → Data labels: ON → show both count and % conversion
- Format → Colors: Stage 1 = #1F4E79, Stage 2 = #2E75B6, Stage 3 = #F39C12, Stage 4 = #27AE60
- Format → Title: 'Customer Journey: Member → Policy → Claim → Approval'
- This shows management the conversion rate at each stage

Visual 5: Table — Customer 360 View

Column	Source	Format
CustomerID	DIM_Customer[CustomerID]	Text — clickable for drill-through
CustomerName	DIM_Customer[CustomerName]	Bold text
Segment	DIM_Customer[CustomerSegment]	Conditional color background
State	DIM_Customer[State]	Text
Policies Count	COUNTROWS(DIM_Policy) in customer context	Whole number
Total Claim Amount	Total_Claim_Amount	■ format
Total Approved	Total_Approved_Amount	■ format, Green
Claims Above Avg	Claims_Above_Avg measure	Text with icon
% of Total Claims	Pct_of_Total_Claims measure	%, 1 decimal

Step-by-step:

- Visualizations → Table
- Add all columns from above
- CustomerSegment conditional formatting: Premium = #FEF9C3 (Gold tint), Standard = #EBF3FB (Blue tint), Basic = #F2F3F4 (Gray)
- Pct_of_Total_Claims: Format → Cell elements → Data bars — shows bar within cell
- Claims_Above_Avg: Format → Cell elements → Icon sets → UP arrow = Above Average, DOWN = Below
- Add Top N filter: Show top 20 customers by Total_Claim_Amount
- Format → Column headers: #4A235A background, White text
- Format → Title: 'Customer 360° Claims Overview — Top 20 Claimants'
- Enable drill-through: right-click CustomerID → set as drill-through field to a Customer Detail page (optional)

Advanced Features — Apply Across All Pages

► Dynamic Page Titles

- Click on your page title text box
- Format → Title → Title text → click 'fx' (conditional formatting) button
- Field value: create a measure: Page_Title = 'Claims Dashboard | Year: ' & SELECTEDVALUE(DIM_Date[Year], 'All Years')
- This title changes dynamically based on slicer selection

► Bookmarks for View Switching

- View → Bookmarks pane → Add bookmark
- Example: Show 'Policy Type = Health' filtered view → bookmark as 'Health View'
- Add a button → Format → Action → Bookmark → select your bookmark
- This lets users toggle between pre-saved filtered views

► Conditional Formatting on KPI Cards

- Select KPI Card → Format → Callout value → Font color → FX
- Rules: If value >= 90 (for Settlement Ratio) → color Green (#27AE60)
- Rules: If value between 75 and 90 → color Amber (#F39C12)
- Rules: If value < 75 → color Red (#C0392B)
- This gives instant RAG (Red-Amber-Green) status indication

► Tooltips Page

- Add a new page → Page Information → Allow use as tooltip: ON → Page type: Tooltip
- Make it small (320×240px): View → Page view → set custom canvas size
- Add mini charts / KPIs that appear on hover over any visual
- On main visual: Format → Tooltip → Type: Report page → Page: select your tooltip page

► Sync Slicers

- View → Sync slicers panel
- Select Year slicer → check sync checkboxes for all 5 pages
- Check 'visible' for pages where you want it to show, 'sync' for all to respond
- This ensures Year filter applies consistently across entire report

► Row Level Security (RLS) — Interview Topic

- Modeling tab → Manage Roles → New Role → Name: 'Agent View'
- Table: DIM_Agent → Filter: [AgentName] = USERPRINCIPALNAME()
- This ensures each agent only sees their own data when report is published
- Test RLS: Modeling → View as → select the role you created
- In Power BI Service: Go to dataset → Security → add agent emails to their roles

Quick Reference — All Visuals Summary

Page	Visual	Type	Primary Measure	Key Fields
Overview	KPI Cards (5)	Card	Various	See Page 1 section
Overview	Monthly Trend	Line Chart	Total_Claim_Amount	DIM_Date[YearMonth]
Overview	Policy Type Split	Donut Chart	Total_Active_Policies	DIM_Policy[PolicyType]
Overview	Top 10 States	Bar Chart	Total_Claim_Amount	DIM_Customer[State]
Overview	YTD vs PYTD	Multi-Row Card	YTD_Claims_Amount , Prev_Year_Claims	DIM_Date
Claims	KPI Cards (5)	Card	Various	See Page 2 section
Claims	Status by Policy	Clustered Bar	Total_Claims_Filed	ClaimStatus, PolicyType
Claims	Rejection Heatmap	Matrix	Claim_Rejection_Rate	RejectionReason, PolicyType
Claims	Claim Scatter	Scatter Plot	ClaimAmount, ProcessingDays	ClaimCategory
Claims	Rolling 3M Trend	Line Chart	Rolling_3M_Claims	DIM_Date[YearMonth]
Policy	KPI Cards (4)	Card	Various	See Page 3 section
Policy	Premium by Type	Stacked Bar	Total_Annual_Premium	PolicyType, PaymentFreq
Policy	Policies Over Time	Area Chart	Count of PolicyID	PolicyStartDate Year
Policy	Channel Treemap	Treemap	Total_Annual_Premium	Channel, PolicyType
Policy	Top 10 Policies	Table	AnnualPremium, PolicyStatus	DIM_Policy fields
Agent	KPI Cards (4)	Card	Various	See Page 4 section
Agent	Leaderboard	Table	Total_Annual_Premium, Rank	DIM_Agent + Measures
Agent	Premium by Region	Column Chart	Total_Annual_Premium	Region, AgentType
Agent	Experience Scatter	Scatter Plot	Total_Annual_Premium	ExperienceYears
Agent	Agent Map	Map/Filled Map	Total_Annual_Premium	DIM_Agent[State]
Customer	KPI Cards (5)	Card	Various	See Page 5 section
Customer	By Segment	Column Chart	COUNTROWS(DIM_Customer)	CustomerSegment
Customer	Gender & Policy	Stacked Bar	Total_Claims_Filed	Gender, PolicyType

Page	Visual	Type	Primary Measure	Key Fields
Customer	Journey Funnel	Funnel Chart	Stage measures	4 custom measures
Customer	Customer 360	Table	Multiple measures	DIM_Customer + measures

This completes the full dashboard creation guide for all 5 pages of the InsureVision Analytics Power BI project. Follow each section page by page, visual by visual, and you will have a production-quality insurance dashboard ready for student presentations and interviews.
